PROJECTS

Royal Fleet (royal-fleet.vercel.app)

Royal Fleet is a responsive web application built using Next.js, offering seamless navigation and user-friendly design. It efficiently integrates front-end and back-end systems to provide an optimized experience for fleet management. The project emphasizes performance and scalability for a smooth user experience.

AutoBid-Up

AutoBid-Up is a car bidding platform developed as my Final Year Project using Next.js and Django. The platform streamlines the car auction process with a user-friendly interface and real-time bidding functionality. It demonstrates strong integration between front-end and back-end systems for seamless user experience.
